(f) Regional value content.

(i) For purposes of subdivision (b)(ii)(B) of this note, except for goods to which subdivision (f)(iii) applies, the regional value content of a good referred to in subdivision (n) of this note, shall be calculated by the importer, exporter or producer of the good on the basis of the build-down method or the build-up method described below.

(A) For the build-down method, the regional value content of a good may be calculated on the basis of the formula

$$RVC = ((AV-VNM)/AV) \times 100$$

where RVC is the regional value content of the good, expressed as a percentage; AV is the adjusted value of the good; and VNM is the value of nonoriginating materials that are acquired and used by the producer in the production of the good, but does not include the value of a material that is self-produced.

(B) For the build-up method, the regional value content of a good may be calculated on the basis of the formula

$$RVC = ((VOM)/AV) \times 100$$

where RVC is the regional value content of the good, expressed as a percentage; AV is the adjusted value of the good; and VOM is the value of originating materials that are acquired or self-produced, and used by the producer in the production of the good.

(ii) Value of materials.

(A) For the purpose of calculating the regional value content of a good under this note, and for purposes of applying the de minimis rules under subdivision (e) of this note, the value of a material is--

- (1) in the case of a material that is imported by the producer of the good, the adjusted value of the material;
- (2) in the case of a material acquired in the territory in which the good is produced, the value, determined in accordance with Articles 1 through 8, Article 15, and the corresponding interpretive notes of the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994 referred to in section 101(d)(8) of the Uruguay Round Agreements Act, as set forth in regulations promulgated by the Secretary of the Treasury providing for the application of such Articles in the absence of an importation; or
- (3) in the case of a material that is self-produced, the sum of--
  - (I) all expenses incurred in the production of the material, including general expenses; and
  - (II) an amount for profit equivalent to the profit added in the normal course of trade.

(B) The following expenses, if not included in the value of an originating material calculated under subdivision (f)(ii)(A) above, may be added to the value of the originating material:

- (1) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of one or more of the parties to the Agreement to the location of the producer;
- (2) duties, taxes and customs brokerage fees on the material paid in the territory of one or more of the parties to the Agreement, other than duties or taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;
- (3) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or byproducts.

(C) The following expenses, if included in the value of a nonoriginating material calculated under subdivision (f)(ii)(A) above, may be deducted from the value of the nonoriginating material:

- (1) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of one or more of the parties to the Agreement to the location of the producer;

  - (3) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or byproducts;
  - (4) the cost of originating materials used in the production of the nonoriginating material in the territory of one or more of the parties to the Agreement.
- (iii) Special rule for certain automotive goods.
- (A) For purposes of subdivision (b)(ii)(B) of this note, the regional value content of an automotive good referred to in subdivision (n) of this note may be calculated by the importer, exporter or producer of the good on the basis of the following net cost method:
- $$RVC = ((NC-VNM)/NC) \times 100$$
- where RVC is the regional value content of the automotive good, expressed as a percentage; NC is the net cost of the automotive good; and VNM means the value of nonoriginating materials that are acquired and used by the producer in the production of the automotive good, but does not include the value of a material that is self-produced. For purposes of this subdivision, the term "automotive good" means a good provided for in any of subheadings 8407.31 through 8407.34, subheading 8408.20, heading 8409 or in any of headings 8701 through 8708, inclusive, of the tariff schedule.
- (B) For purposes of determining the regional value content under this subdivision for an automotive good that is a motor vehicle provided for in any of headings 8701 through 8705, an importer, exporter or producer may average the amounts calculated under the formula contained in subdivision (A) above, over the producer's fiscal year--
- (1) with respect to all motor vehicles in any one of the categories described in subdivision (C), below; or
  - (2) with respect to all motor vehicles in any such category that are exported to the territory of one or more of the parties to the Agreement.
- (C) A category is described for purposes of subdivision (B)(1) above if it--
- (1) is the same model line of motor vehicles, is in the same class of vehicles, and is produced in the same plant in the territory of a party to the Agreement, as the good described in subdivision (B) for which regional value content is being calculated;
  - (2) is the same class of motor vehicles, and is produced in the same plant in the territory of a party to the Agreement, as the good described in subdivision (B) for which regional value content is being calculated; or
  - (3) is the same model line of motor vehicles produced in the territory of a party to the Agreement, as the good described in subdivision (B) for which regional value content is being calculated.
- (D) For purposes of determining the regional value content under subdivision (A) above for automotive goods provided for in any of subheadings 8407.31 through 8407.34, in subheading 8408.20 or in heading 8409, 8706, 8707 or 8708, that are produced in the same plant, an importer, exporter or producer may--
- (1) average the amounts calculated under the formula contained in subdivision (A) above over--
    - (I) the fiscal year of the motor vehicle producer to whom the automotive goods are sold,
    - (II) any quarter or month, or
    - (III) its own fiscal year,if the goods were produced during the fiscal year, quarter or month that is the basis for the calculation;

- (E) The importer, exporter or producer shall, consistent with the provisions regarding allocation of costs set out in generally accepted accounting principles, determine the net cost of an automotive good under subdivision (B) by--
- (1) calculating the total cost incurred with respect to all goods produced by the producer of the automotive good, subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost of all such goods, and then reasonably allocating the resulting net cost of those goods to the automotive good;
  - (2) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or
  - (3) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of all such costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs or nonallowable interest costs.
- (F) For purposes of this note, the term "class of motor vehicles" means any one of the following categories of motor vehicles:
- (1) motor vehicles provided for in subheading 8701.20, 8704.10, 8704.22, 8704.23, 8704.32 or 8704.90, or heading 8705 or 8706, or motor vehicles for the transport of 16 or more persons provided for in subheading 8702.10 or 8702.90;

- (H) For purposes of this note, the term "nonallowable interest costs" means interest costs incurred by a producer that exceed 700 basis points above the applicable official interest rate for comparable maturities of the party to the Agreement in which the producer is located.
- (I) For purposes of this note, the term "reasonably allocate" means to apportion in a manner that would be appropriate under generally accepted accounting principles.
- (J) For purposes of this note, the term "total cost" means all product costs, period costs and other costs for a good incurred in the territory of one or more of the parties to the Agreement.
- (g) Accessories, spare parts or tools.
- (i) Subject to subdivision (g)(ii) and (g)(iii), accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--
    - (A) be treated as originating goods if the good is an originating good; and

  - (iii) If the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
- (h) Fungible goods and materials.
- (i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:
    - (A) averaging,
    - (B) "last-in, first-out,"
    - (C) "first-in, first out," or
    - (D) any other method that is recognized in the generally accepted accounting principles of the party to the Agreement in which the production is performed or otherwise accepted by that country.

The term "fungible good" or fungible material" means a good or material, as the case may be, that is interchangeable with another good or material for commercial purposes and the properties of which are essentially identical to such other good or material.

- (ii) A person selecting an inventory management method under subdivision (h)(i) for a particular fungible good or fungible material shall continue to use that method for that fungible good or fungible material throughout the fiscal year of that person.
- (i) Packaging or packing materials and containers.
- (i) For retail sale.--Packaging materials and containers in which a good is packaged for retail sale, if classified with the good, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (n) of this note and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
  - (ii) For shipment.--Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good.
- (j) Indirect materials.

An indirect material shall be treated as an originating material for purposes of this note without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including—

- (i) fuel and energy;
- (ii) tools, dies and molds;
- (iii) spare parts and materials used in the maintenance of equipment or buildings;
- (iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment or buildings;
- (v) gloves, glasses, footwear, clothing, safety equipment and supplies;

- (vi) equipment, devices and supplies used for testing or inspecting the good;
  - (vii) catalysts and solvents; and
  - (viii) any other goods that are not incorporated into the good but the use of which in the production of the good can reasonably be demonstrated to be a part of that production.
- (k) For the purposes of this note, the term “generally accepted accounting principles” means the recognized consensus or substantial authoritative support in the territory of a party to the Agreement with respect to the recording of revenues, expenses, costs, assets and liabilities, the disclosure of information and the preparation of financial statements. The principles may encompass broad guidelines of general application as well as detailed standards, practices and procedures.
- (l) Claims for preferential tariff treatment; record-keeping requirements and verification.
- (i) Claims for preferential tariff treatment.--An importer may make a claim for the tariff and other treatment provided for under the terms of this note based on either--
    - (A) a written or electronic certification by the importer, exporter or producer; or
    - (B) the importer's knowledge that the good is an originating good, including reasonable reliance on information in the importer's possession that the good is an originating good;in such form and manner as may be required in applicable regulations.
  - (ii) Record-keeping requirements.--An importer of a good, for which entry is claimed under the terms of this note, shall maintain, for a minimum of five years from the date of importation of the good, all records and documents necessary to demonstrate that the good qualified for the tariff and other treatment provided for under the terms of this note, in such form and manner as may be required in applicable regulations.
  - (iii) Verification.--For purposes of determining whether a good imported into the customs territory of the United States from the territory of another party to the Agreement qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification as set forth in pertinent regulations.
- (m) Interpretation and application of rules of origin.
- (i) Unless otherwise specified, the requirements of any rule in subdivision (n) of this note that is set out adjacent to a heading or subheading of the tariff schedule and specifies a change of tariff classification applies only to nonoriginating materials. For purposes of this subdivision and subdivision (n) of this note, a tariff provision is a “heading” if its article description is not indented; a provision is a “subheading” if it is designated by 6 digits under the Harmonized Commodity Description and Coding System; and the terms “chapter” and “section” refer to a chapter or section, respectively, of the tariff schedule.
  - (ii) Where a specific rule in subdivision (n) of this note is defined using the criterion of a change in tariff classification, and the rule is written to exclude tariff provisions at the level of a chapter, heading or subheading of the tariff schedule, such rule shall be construed to require that materials classified in those excluded provisions be originating for the good to qualify as originating.
  - (iii) When a heading or subheading of the tariff schedule is subject to alternative specific rules in subdivision (n) of this note, the rule will be considered to be met if a good satisfies one of the alternatives.
  - (iv) When a single rule is applicable to a group of headings or subheadings, and that rule of origin specifies a change of heading or subheading, the requirement shall be interpreted so that the change of heading or subheading may occur within a single heading or subheading or between headings or subheadings of the group. When, however, a rule refers to a change in heading or subheading “outside that group,” such change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule.
  - (v) References to weight in the rules set forth in subdivision (n) of this note for goods provided for in chapters 1 through 24 of the tariff schedule are to dry weight, unless otherwise specified in the tariff schedule.

- (vi) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods shall be treated as originating in the territory of a party to the Agreement even if grown from seeds, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a country other than a party to the Agreement.
- (vii) This subdivision confers origin on the goods specified in the provisions below, except as otherwise specified herein. Notwithstanding the preceding sentence, a good is originating if it meets the applicable change in tariff classification rules specified in subdivision (n) of this note.
  - (A) A good of chapters 27 through 40, inclusive (except a good of heading 3823), of the tariff schedule, that is the product of a chemical reaction in the territory of one or more of the parties to the Agreement shall be treated as originating. For purposes of applying this subdivision to goods of the foregoing chapters, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of determining whether a good is originating:
    - (1) dissolution in water or in another solvent;
    - (2) the elimination of solvents, including solvent water; or
    - (3) the addition or elimination of water of crystallization.
  - (B) For the purposes of chapters 28 through 35 and chapters 38 and 39, a good that is subject to purification shall be treated as originating provided that one of the following occurs in the territory of one or more of the parties to the Agreement:
    - (1) the purification results in the elimination of 80 percent of the impurities; or
    - (2) the purification results in the reduction or elimination of impurities, rendering the good suitable:
      - (I) as a pharmaceutical, medicinal, cosmetic, veterinary or food grade substance;
      - (II) as a chemical good or reagent for analytical, diagnostic or laboratory uses;
      - (III) as an element or component for use in micro-elements;
      - (IV) for specialized optical uses;
      - (V) for non toxic uses for health and safety;
      - (VI) for biotechnical use;
      - (VII) as a carrier used in a separation process; or
      - (VIII) for nuclear grade uses.
  - (C) A good of chapters 30 or 31, heading 3302, subheading 3502.20, headings 3506 through 3507, inclusive, heading 3707 or chapters 39 or 40 shall be treated as originating if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of one or more of the parties to the Agreement.
  - (D) A good of chapter 30, 31 or 39 shall be treated as originating if the following occurs in the territory of one or more of the parties to the Agreement:
    - (1) the deliberate and controlled reduction in particle size of a good, other than by merely crushing (or pressing), resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials; or

- (2) the deliberate and controlled modification in particle size of a good, other than by merely pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials.
- (E) A good of chapters 28 through 32, 35 or 38 shall be treated as originating if the production of standards materials occurs in the territory of one or more of the parties to the Agreement. For purposes of this subdivision, "standards materials" (including standards solutions) are preparations suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions which are certified by the manufacturer.
- (F) A good of chapters 28 through 32, 35 or 39 shall be treated as originating if the isolation or separation of isomers from mixtures of isomers occurs in the territory of one or more of the parties to the Agreement.
- (G) A good of chapters 28 through 38 that undergoes a change from one tariff classification to another in the territory of one or more of the parties to the Agreement as the result of the separation of one or more individual materials from a man-made mixture shall not be treated as originating unless the isolated material underwent a chemical reaction in the territory of one or more of the parties to the Agreement.
- (viii) (A) A textile good of chapters 50 through 60 of the tariff schedule and imported under heading 9822.05.01 of the tariff schedule shall be considered originating if it is wholly formed in the territory of one or more of the parties to the Agreement from--
  - (1) one or more fibers and yarns listed in U.S. note 20 to subchapter XXII of chapter 98; or
  - (2) a combination of the fibers and yarns listed in U.S. note 20 to such subchapter XXII and one or more fibers and yarns that originate under the terms of this note.

The originating fibers and yarns referred to in subdivision (A)(2) may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (n) of this note. Any elastomeric yarn (except latex) contained in the originating yarns referred to in subdivision (A)(2) must be formed in the territory of one or more of the parties to the Agreement.

- (B) An apparel good of chapter 61 or 62 of the tariff schedule and imported under heading 9822.05.01 of the tariff schedule shall be considered originating if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of one or more of the parties to the Agreement, and if the fabric of the outer shell, exclusive of collars, cuffs and ribbed waistbands (only if the ribbed waistband is present in combination with cuffs and identical in fabric construction to the cuffs) where applicable, is wholly of--
  - (1) one or more fabrics listed in U.S. note 20 to subchapter XXII of chapter 98; or
  - (2) one or more fabrics or knit to shape components formed in the territory of one or more of the parties to the Agreement from one or more of the yarns listed in U.S. note 20 to such subchapter XXII; or
  - (3) any combination of the fabrics referred to in subdivision (B)(1), the fabrics or knit to shape components referred to in subdivision (B)(2), or one or more fabrics originating under this note.

The originating fabrics referred to in subdivision (B)(3) may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (n) of this note. Any elastomeric yarn (except latex) contained in an originating fabric or knit to shape component referred to in subdivision (B)(3) must be formed in the territory of one or more of the parties to the Agreement.

- (C) A textile good of chapter 63 or 94 of the tariff schedule and imported under heading 9822.05.01 of the tariff schedule shall be considered originating if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of one or more of the parties to the Agreement, and if the component that determines the tariff classification of the good is wholly of--
  - (1) one or more fabrics listed in U.S. note 20 to subchapter XXII of chapter 98; or
  - (2) one or more fabrics or knit to shape components formed in the territory of one or more of the parties to the Agreement from one or more of the yarns listed in U.S. note 20 to such subchapter XXII; or

The originating fabrics referred to in subdivision (C)(3) may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (n) of this note. Any elastomeric yarn (except latex) contained in an originating fabric or knit to shape component referred to in subdivision (C)(3) must be formed in the territory of one or more of the parties to the Agreement.

- (C) The term “material produced in the territory of Bahrain or of the United States, or both” means a good that is either wholly the growth, product or manufacture of Bahrain or of the United States, or both, or a new or different article of commerce that has been grown, produced or manufactured in the territory of Bahrain or of the United States, or both.
- (D) The term “new or different article of commerce” means, except as provided in this subdivision, a good that--
- (1) has been substantially transformed from a good or material that is not wholly the growth, product or manufacture of Bahrain or of the United States, or both; and
  - (2) has a new name, character or use distinct from the good or material from which it was transformed,
- but a good shall not be considered a new or different article of commerce by virtue of having undergone simple combining or packaging operations, or mere dilution with water or another substance that does not materially alter the characteristics of the good.
- (E) The term “simple combining or packaging operations” means operations such as adding batteries to devices, fitting together a small number of components by bolting, gluing or soldering, and repacking or packaging components together.
- (F) The term “recovered goods” means materials in the form of individual parts that result from--
- (1) the complete disassembly of used goods into individual parts; and
  - (2) the cleaning, inspecting, testing or other processing of those parts that is necessary for improvement to sound working condition.
- (G) The term “remanufactured good” means an industrial good that is assembled in the territory of Bahrain or of the United State and that--
- (1) is entirely or partially comprised of recovered goods;

- (H) The term “substantially transformed” means, with respect to a good or a material, changed as the result of a manufacturing or processing operation so that--
- (1) (aa) the good or material is converted from a good that has multiple uses into a good or material that has limited uses;
  - (bb) the physical properties of the good or material are changed to a significant extent; or
  - (cc) the operation undergone by the good or material is complex by reason of the number of processes and materials involved and the time and level of skill required to perform those processes; and
- (2) the good or material loses its separate identity in the manufacturing or processing operation.

- (v) A good shall not be considered to be imported directly into the territory of the United States from the territory of Bahrain for purposes of this note if, after exportation from the territory of Bahrain or of the United States, the good undergoes production, manufacturing or any other operation outside the territory of Bahrain or of the United States, other than unloading, reloading or any other operation necessary to preserve the good in good condition or to transport the good to the territory of Bahrain or of the United States.
- (e) Textile and apparel articles.
  - (i) Except as provided in subdivision (ii) below, a textile or apparel good that is not an originating good under the terms of this note, because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in subdivision (h) of this note, shall be considered to be an originating good if the total weight of all such fibers or yarns in that component is not more than seven percent of the total weight of that component. Notwithstanding the preceding sentence, a textile or apparel good containing elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered to be an originating good only if such yarns are wholly formed in the territory of Bahrain or of the United States.
  - (ii) Notwithstanding the rules set forth in subdivision (h) of this note, textile and apparel goods classifiable as goods put up in sets for retail sale as provided for in general rule of interpretation 3 to the tariff schedule shall not be considered to be originating goods unless each of the goods in the set is an originating good or the total value of the nonoriginating goods in the set does not exceed ten percent of the value of the set determined for purposes of assessing customs duties.
  - (iii) For purposes of this note, in the case of a textile or apparel good that is a yarn, fabric or group of fibers, the term "component of the good that determines the tariff classification of the good" means all of the fibers in the yarn, fabric or group of fibers.
  - (iv) For purposes of this note, the term "textile or apparel good" means a good listed in the Annex to the Agreement on Textiles and Clothing referred to in section 101(d)(4) of the Uruguay Round Agreements Act (19 U.S.C. 3511(d)(4)).
- (f) Indirect materials.

Indirect materials shall be disregarded in determining whether a good qualifies as an originating good, except that the cost of such indirect materials may be included in meeting the 35 percent value-content requirement of subdivision (b)(ii) of this note where applicable. An "indirect material" means a good used in the growth, production, manufacture, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the growth, production or manufacture of a good, including—

- (i) fuel and energy;
- (ii) tools, dies and molds;
- (iii) spare parts and materials used in the maintenance of equipment and buildings;
- (iv) lubricants, greases, compounding materials and other materials used in the growth, production or manufacture of a good or used to operate equipment and buildings;
- (v) gloves, glasses, footwear, clothing, safety equipment and supplies;
- (vi) equipment, devices and supplies used for testing or inspecting the good;
- (vii) catalysts and solvents; and
- (viii) any other goods that are not incorporated into the good but the use of which in the growth, production or manufacture of the good can reasonably be demonstrated to be a part of that growth, production or manufacture.

- (i) Subject to subdivision (g)(ii) and (g)(iii), accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--
    - (A) be treated as originating goods if the good is an originating good; and
    - (B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (n) of this note.
  - (ii) Subdivision (g)(i) shall apply only if--
    - (A) the accessories, spare parts or tools are classified with and not invoiced separately from the good, regardless of whether such accessories, spare parts or tools are specified or separately identified in the invoice for the good; and
    - (B) the quantities and value of the accessories, spare parts or tools are customary for the good.
  - (iii) If the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
- (h) Fungible goods and materials.
- (i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term “inventory management method” means:
    - (A) averaging,
    - (B) “last-in, first-out,”

Peru

(C) "first-in, first out," or

(D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Peru or the United States) or otherwise accepted by that country.

The term "fungible good" or "fungible material" means a good or material, as the case may be, that is interchangeable with another good or material for commercial purposes and the properties of which are essentially identical to such other good or material.

(ii) A person selecting an inventory management method under subdivision (h)(i) for a particular fungible good or fungible material shall continue to use that method for that fungible good or fungible material throughout the fiscal year of such person.

(i) Packaging or packing materials and containers.

(i) For retail sale.--Packaging materials and containers in which a good is packaged for retail sale, if classified with the good, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (n) of this note, and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.

(ii) For shipment.--Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good.

(j) Indirect materials.

An indirect material shall be treated as an originating material for purposes of this note without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of another good but not physically incorporated into that other good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including--

(i) fuel and energy;

(ii) tools, dies and molds;

(iii) spare parts and materials used in the maintenance of equipment or buildings;

(iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment or buildings;

(v) gloves, glasses, footwear, clothing, safety equipment and supplies;

(vi) equipment, devices and supplies used for testing or inspecting the good;

(vii) catalysts and solvents; and

(viii) any other goods that are not incorporated into the other good but the use of which in the production of the other good can reasonably be demonstrated to be a part of that production.

(k) For the purposes of this note, the term "generally accepted accounting principles" means the recognized consensus or substantial authoritative support in the territory of Peru or the United States, as the case may be, with respect to the recording of revenues, expenses, costs, assets and liabilities, the disclosure of information and the preparation of financial statements. The principles may encompass broad guidelines of general application as well as detailed standards, practices and procedures.

(l) Claims for preferential tariff treatment; record-keeping requirements and verification.

(i) Claims for preferential tariff treatment.--An importer may make a claim for the tariff and other treatment provided for under the terms of this note based on either--

(A) a written or electronic certification by the importer, exporter or producer; or

- (B) the importer's knowledge that the good is an originating good, including reasonable reliance on information in the importer's possession that the good is an originating good;

in such form and manner as may be required in applicable regulations.

- (ii) Record-keeping requirements.--An importer of a good, for which entry is claimed under the terms of this note, shall maintain, for a minimum of five years from the date of importation of the good, all records and supporting documents necessary to demonstrate that the good qualified for the tariff and other treatment provided for under the terms of this note, in such form and manner as may be required in applicable regulations. For purposes of this note, the term "records and supporting documents" includes, with respect to an exported good for which entry is claimed under the terms of this note, records and documents related to the origin of the good, including--

- (A) the purchase, cost and value of, and payment for, the good;

- (B) the purchase, cost and value of, and payment for, all materials, including indirect materials, used in the production of the good; and

- (C) the production of the good in the form in which it was exported.

- (iii) Verification.--For purposes of determining whether a good imported into the customs territory of the United States from the territory of Peru qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification as set forth in pertinent regulations.

- (m) Interpretation and application of rules of origin.

- (i) Unless otherwise provided herein, the requirements of any specific rule, or specific set of rules, in subdivision (n) of this note that is set out adjacent to a heading or subheading of the tariff schedule and specifies a change of tariff classification applies only to nonoriginating materials. For purposes of this subdivision and subdivision (n) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System; and the terms "chapter" and "section" refer to a chapter or section, respectively, of the tariff schedule.

- (ii) Where a specific rule in subdivision (n) of this note is defined using the criterion of a change in tariff classification, and the rule is written to exclude tariff provisions at the level of a chapter, heading or subheading of the tariff schedule, such rule shall be construed to require that materials classified in those excluded provisions be originating for the good to qualify as originating.

- (iii) When a heading or subheading of the tariff schedule is subject to alternative specific rules in subdivision (n) of this note, the rule will be considered to be met if a good satisfies one of the alternatives.

- (iv) When a single rule is applicable to a group of headings or subheadings, and that rule of origin specifies a change of heading or subheading, the requirement shall be interpreted so that the change of heading or subheading may occur within a single heading or subheading or between headings or subheadings of the group. When, however, a rule refers to a change in heading or subheading "outside that group," such change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule.

- (v) References to weight in the rules set forth in subdivision (n) of this note for goods provided for in chapters 1 through 24 of the tariff schedule are to dry weight, unless otherwise specified in the tariff schedule.

- (vi) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of a party shall be treated as an originating good even if grown from seeds, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a non-party.

- (vii) This subdivision confers origin on the goods specified in the provisions below, except as otherwise specified herein. Notwithstanding the preceding sentence, a good is originating if it meets the applicable change in tariff classification rules specified in subdivision (n) of this note.

For purposes of applying this subdivision to goods of the foregoing chapters, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of determining whether a good is originating:
- (1) dissolution in water or in another solvent;
  - (2) the elimination of solvents, including solvent water; or
  - (3) the addition or elimination of water of crystallization.
- (B) For the purposes of chapters 28 through 40, a good that is subject to purification shall be treated as originating provided that one of the following occurs in the territory of Peru, the United States, or both:
- (1) the purification results in the elimination of 80 percent of the impurities; or
  - (2) the purification results in the reduction or elimination of impurities, rendering the good suitable:
    - (I) as a pharmaceutical, medicinal, cosmetic, veterinary or food grade substance;
    - (II) as a chemical product or reagent for analytical, diagnostic or laboratory uses;
    - (III) as an element or component for use in micro-elements;

    - (VIII) for nuclear grade uses.
- (C) A good of chapters 30, 31 or 33 through 40 (except heading 3808) shall be treated as an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of Peru, the United States, or both.
- (D) A good of chapter 30, 31, 33 or 39 shall be treated as originating if the deliberate and controlled reduction in particle size of a good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials occurs in the territory of Peru, the United States, or both
- (E) A good of chapters 28 through 38 shall be treated as originating if the production of standards materials occurs in the territory of Peru, the United States, or both. For purposes of this subdivision, "standards materials" (including standards solutions) are preparations suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.
- (F) A good of chapters 28 through 39 shall be treated as originating if the isolation or separation of isomers from mixtures of isomers occurs in the territory of Peru, the United States, or both.

  - (1) for originating materials, the following expenses, if not included in the value of an originating material calculated under subdivision (A) above, may be added to the value of the originating material:
    - (I) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Korea or of the United States, or both, to the location of the producer;
    - (II) duties, taxes and customs brokerage fees on the material paid in the territory of Korea or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and
    - (III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or byproducts; and
  - (2) for non-originating materials, if included the value of a nonoriginating material calculated under subdivision (A) above, the following expenses may be deducted from the value of the nonoriginating material:
    - (I) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Korea or of the United States, or both, to the location of the producer;
    - (II) duties, taxes and customs brokerage fees on the material paid in the territory of Korea or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;

    - (IV) the cost of originating materials used in the production of the nonoriginating material in the territory of Korea or of the United States, or both.
- (C) All costs considered for the calculation of regional value content shall be recorded and maintained in conformity with the generally accepted accounting principles applicable in the territory of the country in which the good is produced (whether Korea or the United States). The term “generally accepted accounting principles”--
  - (i) means the recognized consensus or substantial authoritative support given in the territory of Korea or of the United States, as the case may be, with respect to the recording of revenues, expenses, costs, assets and liabilities, the disclosure of information and the preparation of financial statements, and
  - (ii) may encompass broad guidelines for general application as well as detailed standards, practices and procedures.
- (h) Automotive goods.
  - (i) For purposes of subdivision (b)(ii)(B) of this note, the regional value content of an automotive good referred to in subdivision (o) of this note may be calculated by the importer, exporter or producer of the good on the basis of the build-down method described in subdivision (g)(i)(A) of this note, the build-up method described in subdivision (g)(i)(B) of this note or the following net cost method,  $RVC = (NC - VNM)/NC \times 100$ , where RVC is the regional value content, expressed as a percentage; NC is the net cost of the good; and VNM is the value of nonoriginating materials, other than indirect materials, acquired and used by the producer in the production of the automotive good, but does not include the value of a material that is self-produced.
  - (ii) For purposes of this subdivision, the term “automotive good” means a good provided for in any of subheadings 8407.31 through 8407.34, subheading 8408.20, heading 8409 or any of headings 8701 through 8708.

- (iii) For purposes of determining the regional value content under subdivision (h)(i) of this note for an automotive good that is a motor vehicle provided for in any of headings 8701 through 8705, an importer, exporter or producer may average the amounts calculated under the net cost formula contained in subdivision (h)(i), over the producer's fiscal year—
  - (A) with respect to all motor vehicles in any one of the categories described in subdivision (h)(iv), or
  - (B) with respect to all motor vehicles in any such category that are exported to the territory of Korea or of the United States.
- (iv) A category is described in this subdivision if it—
  - (A) is the same model line of motor vehicles, is in the same class of motor vehicles and is produced in the same plant in the territory of Korea or of the United States, as the good described in subdivision (h)(iii) for which regional value content is being calculated;
  - (B) is the same class of motor vehicles, and is produced in the same plant in the territory of Korea or of the United States, as the good described in subdivision (h)(iii) for which regional value content is being calculated; or
  - (C) is the same model line of motor vehicles produced in the territory of Korea or of the United States as the good described in subdivision (h)(iii) for which regional value content is being calculated.
- (v) The term “class of motor vehicles” means any one of the following categories of motor vehicles:
  - (A) motor vehicles provided for in subheading 8701.20, 8704.10, 8704.22, 8704.23, 8704.32 or 8704.90, or heading 8705 or 8706, or motor vehicles for the transport of 16 or more persons provided for in subheading 8702.10 or 8702.90;
  - (B) motor vehicles provided for in subheading 8701.10 or any of subheadings 8701.30 through 8701.90;
  - (C) motor vehicles for the transport of 15 or fewer persons provided for in subheading 8702.10 or 8702.90, or motor vehicles provided for in subheading 8704.21 or 8704.31; or
  - (D) motor vehicles provided for in any of subheadings 8703.21 through 8703.90.
- (vi) For purposes of determining the regional value content under subdivision (g) of this note for automotive materials provided for in any of subheadings 8407.31 through 8407.34, in subheading 8408.20 or in heading 8409, 8706, 8707 or 8708, that are produced in the same plant, an importer, exporter or producer may—
  - (A) average the amounts calculated under the net cost formula contained in subdivision (h)(i) over—
    - (1) the fiscal year of the motor vehicle producer to whom the automotive goods are sold,
    - (2) any quarter or month, or
    - (3) the fiscal year of the producer of such goods,if the goods were produced during the fiscal year, quarter or month that is the basis for the calculation;
  - (B) determine the average referred to in subdivision (h)(iii) separately for such goods sold to one or more motor vehicle producers; or
  - (C) make a separate determination under subdivision (h)(iii) or (h)(iv) for such goods that are exported to the territory of Korea or of the United States.
- (vii) The importer, exporter or producer of an automotive good shall, consistent with the provisions regarding allocation of costs provided for in generally accepted accounting principles, determine the net cost of the automotive good under subdivision (h)(ii) by—

- (A) calculating the total cost incurred with respect to all goods produced by the producer of the automotive good, subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost of all such goods, and then reasonably allocating the resulting net cost of those goods to the automotive good;
  - (B) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or
  - (C) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of these costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs or nonallowable interest costs.
- (i) Accessories, spare parts or tools.
- (i) Subject to subdivisions (ii) and (iii) of this subdivision, accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--
    - (A) be treated as originating goods if the good is an originating good; and
    - (B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set forth in subdivision (o) of this note.
  - (ii) Subdivision (i)(i) shall apply only if--
    - (A) the accessories, spare parts or tools are classified with and not invoiced separately from the good; and
    - (B) the quantities and value of the accessories, spare parts or tools are customary for the good.
  - (iii) If the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
- (j) Fungible goods and materials.
- (i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:
    - (A) averaging,
    - (B) "last-in, first-out,"
    - (C) "first-in, first out," or
    - (D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Korea or the United States) or otherwise accepted by that country.

The term "fungible good" or "fungible material" means a good or material, as the case may be, that is interchangeable with another good or material for commercial purposes and the properties of which are essentially identical to such other good or material.
  - (ii) A person selecting an inventory management method under subdivision (j)(i) above for a particular fungible good or material shall continue to use that method for that fungible good or material throughout the fiscal year of such person.
- (k) Packaging materials and containers.

- (i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (o) of this note and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
- (ii) Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good.

(l) Indirect materials.

An indirect material shall be disregarded in determining whether a good is an originating good under the terms of this note, except for purposes of subdivision (b)(ii)(B) of this note. The term “indirect material” means a good used in the production, testing or inspection of another good but not physically incorporated into that other good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of another good, including—

- (i) fuel and energy;
- (ii) tools, dies and molds;
- (iii) spare parts and materials used in the maintenance of equipment or buildings;
- (iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment or buildings;
- (v) gloves, glasses, footwear, clothing, safety equipment and supplies;
- (vi) equipment, devices and supplies used for testing or inspecting the good;
- (vii) catalysts and solvents; and
- (viii) any other good that is not incorporated into the other good but the use of which in the production of the other good can reasonably be demonstrated to be a part of that production.

(m) Record-keeping requirements and verification; claims for preferential treatment.

- (i) An importer claiming preferential tariff treatment for a good imported into the territory of the United States under the provisions of this note shall comply in all respects with applicable Customs regulations. Importers shall, upon request by the appropriate customs officer, make available such records as are necessary under applicable regulations to demonstrate that a good qualifies as an originating good under the provisions of this note.
- (ii) For purposes of determining whether a good imported into the customs territory of the United States from the territory of Korea qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification under such terms or procedures as the United States and Korea may agree, as set forth in pertinent regulations.
- (iii) An importer may make a claim for the tariff and other treatment provided for under the terms of this note based on either--
  - (A) a written or electronic certification by the importer, exporter or producer; or
  - (B) the importer's knowledge that the good is an originating good, including reasonable reliance on information in the importer's possession that the good is an originating good, in such form and manner as may be required in applicable regulations.

(n) Interpretation of rules of origin.

- (i) Unless otherwise specified, a rule in subdivision (o) of this note that is set out adjacent and is applicable to a 6-digit subheading in the tariff schedule shall take precedence over a rule applicable to a 4-digit heading superior thereto and covering the goods of such subheading. For purposes of this subdivision and subdivision (o) of this note, a tariff provision is a “heading” if its article description is not indented; a provision is a “subheading” if it is designated by 6 digits under the Harmonized Commodity Description and Coding System.

- (ii) Reference to weight in the rules set forth in subdivision (o) of this note for goods provided for in chapters 1 through 24 of the tariff schedule means dry weight, unless otherwise specified in the tariff schedule.
- (iii) A requirement of a change in tariff classification in subdivision (o) of this note applies only to nonoriginating materials.
- (iv) If goods are classified as a set as a result of the application of rule 3 of the general rules of interpretation of the tariff schedule, the set is originating under this note only if each good in the set is originating. Notwithstanding the first sentence of this subdivision, a set of goods is originating if the value of all the nonoriginating goods in the set does not exceed 15 percent of the adjusted value of the set.
- (v) A good of chapters 1 through 40, inclusive, shall not be considered to be originating solely by reason of mere dilution with water or another substance that does not materially alter the characteristics of the good.
- (vi) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of Korea or of the United States shall be treated as originating therein even if grown from seed, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a country other than Korea or the United States.
- (vii) For purposes of applying this note to goods of chapters 27 through 40, inclusive (except a good of heading 3823), of the tariff schedule, a good that undergoes a chemical reaction as defined herein shall be treated as an originating good for purposes of this note, notwithstanding any product-specific rules enumerated in this note, provided all other applicable requirements are satisfied. A "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of this note:
  - (A) dissolving in water or other solvents;
  - (B) the elimination of solvents including solvent water; or
  - (C) the addition or elimination of water of crystallization.
- (viii) A good of heading in chapters 28 through 40 that satisfies one or more of the provisions enumerated in this subdivision shall be treated as an originating good for purposes of this note, except as otherwise specified in such provisions. Notwithstanding the preceding sentence, a good is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in the rules of origin in subdivision (o) for such chapters.
  - (A) A good of chapters 28 through 40 that is subject to purification shall be treated as an originating good provided that the purification occurs in the territory of Korea or of the United States, or both and results in the following:
    - (1) the elimination of not less than 80 percent of the impurities; or
    - (2) the reduction or elimination of impurities resulting in a good suitable:
      - (I) as a pharmaceutical, medicinal, cosmetic, veterinary or food grade substance;
      - (II) as a chemical product or reagent for analytical, diagnostic or laboratory uses;
      - (III) as an element or component for use in micro-elements;
      - (IV) for specialized optical uses;
      - (V) for non-toxic uses for health and safety;
      - (VI) for biotechnical use;
      - (VII) as a carrier used in a separation process; or
      - (VIII) for nuclear grade uses.

- (B) A good of chapters 30, 31 or 33 through 40 (except for heading 3808) shall be treated as an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having different essential physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of Korea or of the United States, or both.
- (C) A good of chapters 30, 31, 33 or 39 shall be treated as an originating good if the deliberate and controlled modification in particle size of the good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and having different essential physical or chemical characteristics from the input materials, occurs in the territory of Korea or of the United States, or both.
- (D) A good of chapters 28 through 38 shall be treated as an originating good if the production of standards materials occurs in the territory of Korea or of the United States, or both. For the purposes of this subdivision, "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.
- (E) A good of chapters 28 through 39 shall be treated as an originating good if the isolation or separation of isomers from mixtures of isomers occurs in the territory of Korea or of the United States, or both.
- (F) A good of chapters 28 through 38 that undergoes a change from one classification to another in the territory of Korea or of the United States, or both, as a result of the separation of one or more materials from a man-made mixture shall not be treated as an originating good unless the isolated material underwent a chemical reaction in the territory of Korea or of the United States, or both.

    - (I) all expenses incurred in the production of the material, including general expenses, and
    - (II) an amount for profit equivalent to the profit added in the normal course of trade.
- (B) The value of materials may be further adjusted as follows:
- (1) for originating materials, the following expenses, if not included in the value of an originating material calculated under subdivision (A) above, may be added to the value of the originating material:
    - (I) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Colombia or of the United States, or both, to the location of the producer;
    - (II) duties, taxes and customs brokerage fees on the material paid in the territory of Colombia or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and

- (C) All costs considered for the calculation of regional value content shall be recorded and maintained in conformity with the generally accepted accounting principles applicable in the territory of the country in which the good is produced (whether Colombia or the United States). The term “generally accepted accounting principles”--
- (1) means the recognized consensus or substantial authoritative support given in the territory of Colombia or of the United States, as the case may be, with respect to the recording of revenues, expenses, costs, assets and liabilities, the disclosure of information and the preparation of financial statements, and

- (i) For purposes of subdivision (b)(ii)(B) of this note, the regional value content of an automotive good referred to in subdivision (o) of this note may be calculated by the importer, exporter or producer of the good on the basis of the following net cost method,  $RVC = ((NC - VNM) / NC) \times 100$ , where RVC is the regional value content, expressed as a percentage; NC is the net cost of the automotive good; and VNM is the value of nonoriginating materials that are acquired and used by the producer in the production of the automotive good, but does not include the value of a material that is self-produced.
- (ii) For purposes of this subdivision, the term “automotive good” means a good provided for in any of subheadings 8407.31 through 8407.34, subheading 8408.20, heading 8409 or any of headings 8701 through 8708.
- (iii) For purposes of determining the regional value content under subdivision (h)(i) of this note for an automotive good that is a motor vehicle provided for in any of headings 8701 through 8705, an importer, exporter or producer may average the amounts calculated under the net cost formula contained in subdivision (h)(i), over the producer’s fiscal year—
  - (A) with respect to all motor vehicles in any one of the categories described in subdivision (h)(iv), or
  - (B) with respect to all motor vehicles in any such category that are exported to the territory of Colombia or of the United States.
- (iv) A category is described in this subdivision if it—
  - (A) is the same model line of motor vehicles, is in the same class of motor vehicles and is produced in the same plant in the territory of Colombia or of the United States, as the good described in subdivision (h)(iii) for which regional value content is being calculated;
  - (B) is the same class of motor vehicles, and is produced in the same plant in the territory of Colombia or of the United States, as the good described in subdivision (h)(iii) for which regional value content is being calculated; or
  - (C) is the same model line of motor vehicles produced in the territory of Colombia or of the United States as the good described in subdivision (h)(iii) for which regional value content is being calculated.

For purposes of this subdivision, the term “model line of motor vehicles” means a group of motor vehicles having the same platform or model name.
- (v) The term “class of motor vehicles” means any one of the following categories of motor vehicles:
  - (A) motor vehicles provided for in subheading 8701.20, 8704.10, 8704.22, 8704.23, 8704.32 or 8704.90, or heading 8705 or 8706, or motor vehicles for the transport of 16 or more persons provided for in subheading 8702.10 or 8702.90;
  - (B) motor vehicles provided for in subheading 8701.10 or any of subheadings 8701.30 through 8701.90;
  - (C) motor vehicles for the transport of 15 or fewer persons provided for in subheading 8702.10 or 8702.90, or motor vehicles provided for in subheading 8704.21 or 8704.31; or
  - (D) motor vehicles provided for in any of subheadings 8703.21 through 8703.90.
- (vi) For purposes of determining the regional value content under subdivision (h) of this note for automotive materials provided for in any of subheadings 8407.31 through 8407.34, in subheading 8408.20 or in heading 8409, 8706, 8707 or 8708, that are produced in the same plant, an importer, exporter or producer may—
  - (A) average the amounts calculated under the net cost formula contained in subdivision (h)(i) over—
    - (1) the fiscal year of the motor vehicle producer to whom the automotive goods are sold,
    - (2) any quarter or month, or
    - (3) the fiscal year of the producer of such goods,if the goods were produced during the fiscal year, quarter or month that is the basis for the calculation;

- (B) determine the average referred to in subdivision (h)(iii) separately for such goods sold to one or more motor vehicle producers; or
  - (C) make a separate determination under subdivision (h)(iii) or (h)(iv) for such goods that are exported to the territory of Colombia or of the United States.
- (vii) The importer, exporter or producer of an automotive good shall, consistent with the provisions regarding allocation of costs provided for in generally accepted accounting principles, determine the net cost of the automotive good under subdivision (h)(ii) by--
- (A) calculating the total cost incurred with respect to all goods produced by the producer of the automotive good, subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost of all such goods, and then reasonably allocating the resulting net cost of those goods to the automotive good;
  - (B) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or
  - (C) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of these costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs or nonallowable interest costs.
- (viii) For purposes of this subdivision--
- (A) the term "nonallowable interest costs" means interest costs incurred by a producer that exceed 700 basis points above the applicable official interest rate for comparable maturities of the country in which the producer is located;
  - (B) the term "total cost" means all product costs, period costs and other costs for a good incurred in the territory of Colombia or of the United States, or both; and does not include profits that are earned by the producer, regardless of whether they are retained by the producer or paid out to other persons as dividends, or taxes paid on those profits, including capital gains taxes;
  - (C) the term "product costs" means costs that are associated with the production of a good and include the value of materials, direct labor costs and direct overhead;
  - (D) the term "period costs" means costs, other than product costs, that are expensed in the period in which they are incurred, such as selling expenses and general and administrative expenses;
  - (E) the term "net cost" means total cost minus sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost; and
  - (F) the term "other costs" means all costs recorded on the books of the producer that are not product costs or period costs, such as interest.
- (i) Accessories, spare parts or tools.
- (i) Subject to subdivisions (ii) and (iii) of this subdivision, accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--
    - (A) be treated as originating goods if the good is an originating good; and
    - (B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set forth in subdivision (o) of this note.
  - (ii) Subdivision (i)(i) shall apply only if--

Colombia

- (A) the accessories, spare parts or tools are classified with and not invoiced separately from the good; and
  - (B) the quantities and value of the accessories, spare parts or tools are customary for the good.
- (iii) If the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
- (j) Fungible goods and materials.
- (i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:
    - (A) averaging,
    - (B) "last-in, first-out,"
    - (C) "first-in, first out," or
    - (D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Colombia or the United States) or otherwise accepted by that country.
  - (ii) A person selecting an inventory management method under subdivision (j)(i) above for a particular fungible good or material shall continue to use that method for that fungible good or material throughout the fiscal year of such person.
- (k) Packaging materials and containers.
- (i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (o) of this note and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
  - (ii) Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good. For purposes of this subdivision, the term "packing materials and containers for shipment" means goods used to protect another good during its transportation and does not include the packaging materials and containers in which the other good is packaged for retail sale.
- (l) Indirect materials.
- For purposes of this note, an indirect material shall be treated as an originating material without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of another good but not physically incorporated into that other good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of another good, including—
- (i) fuel and energy;
  - (ii) tools, dies and molds;
  - (iii) spare parts and materials used in the maintenance of equipment or buildings;
  - (iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment or buildings;
  - (v) gloves, glasses, footwear, clothing, safety equipment and supplies;
  - (vi) equipment, devices and supplies used for testing or inspecting the good;

(vii) catalysts and solvents; and

(viii) any other good that is not incorporated into the other good but the use of which in the production of the other good can reasonably be demonstrated to be a part of that production.

(m) Claims for preferential tariff treatment; record-keeping requirements and verification.

(i) Claims for preferential tariff treatment.--An importer may make a claim for the tariff and other treatment provided for under the terms of this note based on either--

(A) a written or electronic certification by the importer, exporter or producer; or

(B) the importer's knowledge that the good is an originating good, including reasonable reliance on information in the importer's possession that the good is an originating good;

in such form and manner as may be required in applicable regulations.

(ii) Record-keeping requirements.--An importer of a good, for which entry is claimed under the terms of this note, shall maintain, for a minimum of five years from the date of importation of the good, all records and supporting documents necessary to demonstrate that the good qualified for the tariff and other treatment provided for under the terms of this note, in such form and manner as may be required in applicable regulations. For purposes of this note, the term "records and supporting documents" includes, with respect to an exported good for which entry is claimed under the terms of this note, records and documents related to the origin of the good, including--

(A) the purchase, cost and value of, and payment for, the good;

(B) the purchase, cost and value of, and payment for, all materials, including indirect materials, used in the production of the good; and

(C) the production of the good in the form in which it was exported.

(iii) Verification.--For purposes of determining whether a good imported into the customs territory of the United States from the territory of Colombia qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification as set forth in pertinent regulations.

(n) Interpretation of rules of origin.

(i) Unless otherwise specified, a rule in subdivision (o) of this note that is set out adjacent and is applicable to a 6-digit subheading in the tariff schedule shall take precedence over a rule applicable to a 4-digit heading superior thereto and covering the goods of such subheading. For purposes of this subdivision and subdivision (o) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System.

(ii) A requirement of a change in tariff classification in subdivision (o) of this note applies only to nonoriginating materials. Where such a requirement is written to exclude tariff provisions at the level of a chapter, heading or subheading of the tariff schedule, it shall be construed to mean that the rule requires that materials classified in those excluded provisions must be originating for the good to qualify as an originating good. When a heading or subheading of the tariff schedule is subject to alternative specific rules of origin, a good classified in such a provision may be considered originating if it satisfies one of the alternatives. When a single rule is applicable to a group of headings or subheadings, and that rule specifies a change of heading or subheading, it shall be understood that the change in heading or subheading may occur within a single heading or subheading or between headings or subheadings of the group. When, however, a rule refers to a change in heading or subheading "outside that group," the change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule.

(iii) Reference to weight in the rules set forth in subdivision (o) of this note for goods provided for in chapters 1 through 24 of the tariff schedule means dry weight, unless otherwise specified in the tariff schedule.

- (iv) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of Colombia or of the United States shall be treated as originating therein even if grown from seed, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a country other than Colombia or the United States.
- (v) For purposes of applying this note to goods of chapters 27 through 40, inclusive (except a good of heading 3823), of the tariff schedule, a good that undergoes a chemical reaction as defined herein shall be treated as an originating good for purposes of this note, notwithstanding any product-specific rules enumerated in this note, provided all other applicable requirements are satisfied. A "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of this note:
  - (A) dissolving in water or other solvents;
  - (B) the elimination of solvents including solvent water; or
  - (C) the addition or elimination of water of crystallization.
- (vi) A good of heading in chapters 28 through 40 that satisfies one or more of the provisions enumerated in this subdivision shall be treated as an originating good for purposes of this note, except as otherwise specified in such provisions. Notwithstanding the preceding sentence, a good is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in the rules of origin in subdivision (o) for such chapters.
  - (A) A good of chapters 28 through 40 that is subject to purification shall be treated as an originating good provided that the purification occurs in the territory of Colombia or of the United States, or both and results in the following:
    - (1) the elimination of not less than 80 percent of the impurities; or
    - (2) the reduction or elimination of impurities resulting in a good suitable:
      - (I) as a pharmaceutical, medicinal, cosmetic, veterinary or food grade substance;
      - (II) as a chemical product or reagent for analytical, diagnostic or laboratory uses;
      - (III) as an element or component for use in micro-elements;
      - (IV) for specialized optical uses;
      - (V) for non-toxic uses for health and safety;
      - (VI) for biotechnical use;
      - (VII) as a carrier used in a separation process; or
      - (VIII) for nuclear grade uses.
  - (B) A good of chapters 30, 31 or 33 through 40 (except for heading 3808) shall be treated as an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having different essential physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of Colombia or of the United States, or both.
  - (C) A good of chapters 30, 31, 33 or 39 shall be treated as an originating good if the deliberate and controlled modification in particle size of the good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and having different essential physical or chemical characteristics from the input materials, occurs in the territory of Colombia or of the United States, or both.

- (D) A good of chapters 28 through 38 shall be treated as an originating good if the production of standards materials occurs in the territory of Colombia or of the United States, or both. For the purposes of this subdivision, "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.
- (E) A good of chapters 28 through 39 shall be treated as an originating good if the isolation or separation of isomers from mixtures of isomers occurs in the territory of Colombia or of the United States, or both.
- (F) A good of chapters 28 through 38 that undergoes a change from one classification to another in the territory of Colombia or of the United States, or both, as a result of the separation of one or more materials from a man-made mixture shall not be treated as an originating good unless the isolated material underwent a chemical reaction in the territory of Colombia or of the United States, or both.

(vii) With respect to textile and apparel goods imported under heading 9822.08.25, the following provisions shall apply:

- (A) A textile good of chapters 50 through 60 of the tariff schedule shall be considered to be an originating good under this note if it is wholly formed in the territory of Colombia or of the United States, or both, from—
  - (1) one or more of the fibers and yarns listed in U.S. note 33 to subchapter XXII of chapter 98 of the tariff schedule; or
  - (2) a combination of any of the fibers and yarns listed in such U.S. note 33 and one or more fibers and yarns that are originating goods under the terms of this note.

The originating fibers and yarns referred to in subdivision (A)(2) may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (o) of this note. Any elastomeric yarn contained in such originating yarns referred to in subdivision (A)(2) must be formed in the territory of Colombia or of the United States, or both.

- (B) An apparel good of chapters 61 or 62 of the tariff schedule shall be considered to be an originating good under this note if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of Colombia or of the United States, or both, and if the fabric of the outer shell, exclusive of collars and cuffs where applicable, is wholly of—
  - (1) one or more fabrics listed in U.S. note 33 to subchapter XXII of chapter 98 of the tariff schedule; or
  - (2) one or more fabrics or knit to shape components formed in the territory of Colombia or of the United States, or both, from one or more of the yarns listed in such U.S. note 33; or
  - (3) any combination of the fabrics referred to in subdivision (B)(1), the fabrics or knit to shape components referred to in subdivision (B)(2) or one or more fabrics or knit to shape components that are originating goods under the terms of this note.

The originating fabrics referred to in subdivision (B)(3) may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (o) of this note. Any elastomeric yarn contained in such originating yarns referred to in subdivision (B)(3) must be formed in the territory of Colombia or of the United States, or both.

- (C) A textile good of chapters 42, 63 or 94 of the tariff shall be considered to be an originating good if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of Colombia or of the United States, or both, and if the component that determines the tariff classification of the good is wholly of—
  - (1) one or more of the fabrics listed in U.S. note 33 to subchapter XXII of chapter 98 of the tariff schedule;
  - (2) one or more fabrics or knit to shape components formed in the territory of Colombia or of the United States, or both, from one or more of the yarns listed in such U.S. note 33; or

(B) the good satisfies any other applicable requirements of this note.

The provisions of subdivision (o) of this note shall not apply in determining the country of origin of a textile or apparel good for nonpreferential purposes.

(ii) Subject to the provisions of subdivision (d)(v) below, a textile or apparel good that is not an originating good under the terms of this note because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification, set out in subdivision (o) of this note, shall nonetheless be considered to be an originating good if--

(A) the total weight of all such fibers or yarns in that component is not more than 10 percent of the total weight of that component; or

(iv) Notwithstanding the rules set forth in subdivision (o) of this note, textile or apparel goods classifiable as goods put up in sets for retail sale under general rule of interpretation 3 of the tariff schedule shall not be considered to be originating goods unless (A) each of the goods in the set is an originating good; or (B) the total value of the nonoriginating goods in the set does not exceed 10 percent of the adjusted value of the set.

(v) For purposes of this note--

(A) the expression "wholly formed and finished" means:

- (1) when used in reference to fabrics, all production processes and finishing operations necessary to produce a finished fabric ready for use without further processing, and such processes and operations include formation processes, such as weaving, knitting, needling, tufting, felting, entangling or other such processes, and finishing operations, including bleaching, dyeing and printing; and

(e) De minimis.

(i) Except as provided herein and in subdivision (ii) below, a good (other than a textile or apparel good described in subdivision (d) above) that does not undergo a change in tariff classification pursuant to subdivision (o) of this note is an originating good if--

(A) the value of all nonoriginating materials that are used in the production of the good and that do not undergo the applicable change in tariff classification set forth in subdivision (o) of this note does not exceed 10 percent of the adjusted value of the good;

  - (i) Subject to subdivisions (ii) and (iii) of this subdivision, accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--
    - (A) be treated as originating goods if the good is an originating good; and
    - (B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set forth in subdivision (o) of this note.
  - (ii) Subdivision (i)(i) shall apply only if--
    - (A) the accessories, spare parts or tools are classified with and not invoiced separately from the good, regardless of whether such accessories, spare parts or tools are specified or are separately identified in the invoice for the good; and
    - (B) the quantities and value of the accessories, spare parts or tools are customary for the good.
  - (iii) If the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.

(j) Fungible goods and materials.

(i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:

(A) averaging;

(B) "last-in, first-out";

(C) "first-in, first out"; or

(D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Panama or the United States) or otherwise accepted by that country.

The term "fungible good" or "fungible material" means a good or material, as the case may be, that is interchangeable with another good or material for commercial purposes and the properties of which are essentially identical to such other good or material.

(ii) A person selecting an inventory management method under subdivision (j)(i) above for a particular fungible good or fungible material shall continue to use that method for that fungible good or fungible material throughout the fiscal year of such person.

(k) Packaging materials and containers.

(i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (o) of this note and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.

(ii) Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good. For purposes of this note, the term "packing materials and containers for shipment" means goods used to protect another good during its transportation and does not include the packaging materials and containers in which the other good is packaged for retail sale.

(l) Indirect materials.

For purposes of this note, an indirect material shall be treated as an originating material without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of another good but not physically incorporated into that other good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of another good, including—

(i) fuel and energy;

(ii) tools, dies and molds;

(iii) spare parts and materials used in the maintenance of equipment or buildings;

(iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment or buildings;

(v) gloves, glasses, footwear, clothing, safety equipment and supplies;

(vi) equipment, devices and supplies used for testing or inspecting the good;

(vii) catalysts and solvents; and

(viii) any other good that is not incorporated into the other good but the use of which in the production of the other good can reasonably be demonstrated to be a part of that production.

(m) Record-keeping requirements and verification.

- (i) An importer claiming preferential tariff treatment for a good imported into the territory of the United States under the provisions of this note based on a importer's certification or its knowledge (including reasonable reliance on information in the importer's possession) that the good is an originating good shall maintain, for a minimum of five years from the date of importation of the good, all records necessary to demonstrate that the good qualified for the preferential tariff treatment claimed under this note.
- (ii) An importer claiming preferential tariff treatment for a good imported into the territory of the United States based on a certification issued by the exporter or producer shall maintain, for a minimum of five years from the date of importation of the good, a copy of the certification that served as the basis for the claim. If the importer possesses records demonstrating that the good satisfies the requirements to remain originating under subdivision (c)(iii) of this note, the importer shall maintain such records for a minimum of five years from the date of importation of the good; shall make a written declaration that the good qualifies as originating, under the terms of applicable regulations; and shall be prepared to submit, upon request by the appropriate customs officer, a certification of origin demonstrating that the good qualifies as an originating good under the provisions of this note, including pertinent cost and manufacturing information and all other information requested by such customs officer.
- (iii) A certification that a good is originating may be in written or electronic form, including but not limited to the following elements:
  - (A) the name of the certifying person, including as necessary contact or other identifying information;
  - (B) the importer of the good (if known);
  - (C) the exporter of the good (if different from the producer);
  - (D) the producer of the good (if known);
  - (E) the classification of the good in the tariff schedule and a description of the good;
  - (F) information demonstrating that the good is originating;
  - (G) the date of the certification; and
  - (H) in the case of a blanket certification of multiple shipments of identical goods within any period specified in the written or electronic certification, not exceeding 12 months from the date of the certification, the period of time that the certification covers. For purposes of this subdivision, the term "identical goods" means goods that are the same in all respects relevant to the rule of origin that qualifies the goods as originating goods.

Importers shall, upon request by the appropriate customs officer, make available such records as are necessary under applicable regulations to demonstrate that a good qualifies as an originating good under the provisions of this note.

(iv) For purposes of determining whether a good imported into the customs territory of the United States from the territory of Panama qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification under such terms or procedures as the United States and Panama may agree, as set forth in pertinent regulations.

(n) Interpretation of rules of origin.

- (i) Unless otherwise specified, a rule in subdivision (o) of this note that is set out adjacent and is applicable to a 6-digit subheading in the tariff schedule shall take precedence over a rule applicable to a 4-digit heading superior thereto and covering the goods of such subheading. For purposes of this subdivision and subdivision (o) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System.
- (ii) Reference to weight in the rules set forth in subdivision (o) of this note for goods provided for in chapters 1 through 24 of the tariff schedule means dry weight, unless otherwise specified in the tariff schedule.

- (iii) A requirement of a change in tariff classification in subdivision (o) of this note applies only to nonoriginating materials.
- (iv) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of Panama or of the United States shall be treated as originating therein even if grown from seed, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a country other than Panama or the United States.
- (v) For purposes of applying this note to goods of chapters 27 through 40, inclusive (except a good of heading 3823), of the tariff schedule, a good that undergoes a chemical reaction as defined herein shall be treated as an originating good for purposes of this note, notwithstanding any product-specific rules enumerated in this note, provided all other applicable requirements are satisfied. A "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of this note:
  - (A) dissolving in water or other solvents;
  - (B) the elimination of solvents including solvent water; or
  - (C) the addition or elimination of water of crystallization.
- (vi) A good of heading in chapters 28 through 40 that satisfies one or more of the provisions enumerated in this subdivision shall be treated as an originating good for purposes of this note, except as otherwise specified in such provisions. Notwithstanding the preceding sentence, a good is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in the rules of origin in subdivision (o) for such chapters.
  - (A) A good of chapters 28 through 40 that is subject to purification shall be treated as an originating good provided that the purification occurs in the territory of Panama or of the United States, or both and results in the following:
    - (1) the elimination of not less than 80 percent of the impurities; or
    - (2) the reduction or elimination of impurities resulting in a good suitable:
      - (I) as a pharmaceutical, medicinal, cosmetic, veterinary, or food grade substance;
      - (II) as a chemical product or reagent for analytical, diagnostic, or laboratory uses;
      - (III) as an element or component for use in micro-elements;
      - (IV) for specialized optical uses;
      - (V) for non-toxic uses for health and safety;
      - (VI) for biotechnical use;
      - (VII) as a carrier used in a separation process; or
      - (VIII) for nuclear grade uses.
  - (B) A good of chapters 30, 31 or 33 through 40 (except for heading 3808) shall be treated as an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having different essential physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of Panama or of the United States, or both.
  - (C) A good of chapters 30, 31, 33 or 39 shall be treated as an originating good if the deliberate and controlled modification in particle size of the good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution, or defined surface area, which is relevant to the purposes of the resulting good and having different essential physical or chemical characteristics from the input materials, occurs in the territory of Panama or of the United States, or both.

- (D) A good of chapters 28 through 38 shall be treated as an originating good if the production of standards materials occurs in the territory of Panama or of the United States, or both. For the purposes of this subdivision, "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating, or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.
- (E) A good of chapters 28 through 39 shall be treated as an originating good if the isolation or separation of isomers from mixtures of isomers occurs in the territory of Panama or of the United States, or both.
- (F) A good of chapters 28 through 38 that undergoes a change from one classification to another in the territory of Panama or of the United States, or both, as a result of the separation of one or more materials from a man-made mixture shall not be treated as an originating good unless the isolated material underwent a chemical reaction in the territory of Panama or of the United States, or both.

(vii) With respect to textile and apparel goods imported under heading 9822.09.62, the following provisions shall apply:

- (A) A textile good of chapters 50 through 60 of the tariff schedule shall be considered to be an originating good under this note if it is wholly formed in the territory of Panama or of the United States, or both, from—

  - (2) a combination of any of the fibers, yarns and fabrics listed in such U.S. note 39 and one or more fibers, yarns and fabrics that are originating goods under the terms of this note.

The originating fibers and yarns referred to in subdivision (A)(2) may contain up to 10 percent by weight of fibers and yarns that do not undergo an applicable change in tariff classification set out in subdivision (o) of this note. Any elastomeric yarn contained in such originating yarns referred to in subdivision (A)(2) must be formed in the territory of Panama or of the United States, or both.

- (B) An apparel good of chapters 61 or 62 of the tariff schedule shall be considered to be an originating good under this note if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of Panama or of the United States, or both, and if the fabric of the outer shell, exclusive of collars and cuffs where applicable, is wholly of—
  - (1) one or more fabrics listed in U.S. note 39 to subchapter XXII of chapter 98 of the tariff schedule; or

  - (3) any combination of the fabrics referred to in subdivision (B)(1), the fabrics or knit to shape components referred to in subdivision (B)(2) or one or more fabrics or knit to shape components that are originating goods under the terms of this note.

The originating fabrics referred to in subdivision (B)(3) may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (o) of this note. Any elastomeric yarn contained in such originating yarns referred to in subdivision (B)(3) must be formed in the territory of Panama or of the United States, or both.

- (C) A textile good of chapter 63 or subheading 9404.90 of the tariff schedule shall be considered to be an originating good if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of Panama or of the United States, or both, and if the component that determines the tariff classification of the good is wholly of—
  - (1) one or more of the fabrics listed in U.S. note 39 to subchapter XXII of chapter 98 of the tariff schedule;
  - (2) one or more fabrics or knit to shape components formed in the territory of Panama or of the United States, or both, from one or more of the yarns listed in such U.S. note 39; or

In the case of overland shipments originating in Canada or Mexico, such costs shall include freight, insurance, and all other charges, costs and expenses incurred in bringing the merchandise from the point of origin (where the merchandise begins its journey to the United States) in Canada or Mexico to the first U.S. port of entry; and

Therefore, when the price of goods includes freight, insurance and other charges (e.g., the terms of sale are CIF), estimates of those charges reported pursuant to this note may not be deducted from the price to arrive at the value declared to the Customs Service. However, when the actual charges are known, they must be excluded to arrive at the declared value.

## 2. Statistical Annotations.

(a) The statistical annotations to the Harmonized Tariff Schedule of the United States consist of--

- (i) the 2-digit statistical suffixes and any article descriptions applicable thereto,
- (ii) the indicated units of quantity, and
- (iii) the statistical notes and annexes.

(b) The legal text of the Harmonized Tariff Schedule of the United States consists of the remaining text as more specifically identified in the general rules of interpretation.

## 3. Statistical Reporting Number.

(a) Except as provided in paragraph (b) of this note, and in the absence of specific instructions to the contrary elsewhere, the statistical reporting number for an article consists of the 10-digit number formed by combining the 8-digit subheading number with the appropriate 2-digit statistical suffix. Thus, the statistical reporting number for live monkeys dutiable under subheading 0106.00.50 is "0106.00.5010".

(b) Whenever in the tariff schedule an article is classifiable under a provision which derives its rate of duty from a different provision, the statistical reporting number is, in the absence of specific instructions to the contrary elsewhere, the 10-digit number for the basic provision followed by the 10-digit subheading number of the provision from which the rate is derived. Thus, the statistical reporting number for certain mountings for optical telescopes is "9005.90.8000-9005.80.4040". If multiple statistical reporting numbers are shown for the subheading from which the duty rate is derived and the shipment contains articles covered by more than one statistical reporting number from the subheading, then report the last applicable statistical reporting number only.

(c) (i) Goods of a country with which the United States has a free trade agreement, that meet the terms of that agreement, when marked or eligible to be marked with their country of origin, and entered with any of the following special program indicators (SPIs) prefacing the 10-digit HTS number are exempt from the Merchandise Processing Fee (MPF):

**Exports of Articles Previously Imported for Repair or Alterations; Instruments of International Traffic; Articles Donated for Relief or Charity, Not Elsewhere Specified or Included; Military Wearing Apparel; Military Equipment Not Identified By Kind**

Statistical Notes

1. For the purpose of Schedule B number 9801.10.0000, the value of repairs or alterations made in the United States shall be:
  - (a) Reported only for articles previously imported for repairs or alterations.
  - (b) The total cost of the repair or alteration (including parts and labor); or
  - (c) If no charge is made, the value to the exporter of such repair or alteration.
  
2. Shipping containers leaving the United States strictly as instruments of international traffic (i.e., in their capacity as carriers of merchandise), and not for sale or transfer of ownership, are not considered to be exported; therefore, such containers are not required to be reported on the Shipper's Export Declaration. However, they may be:
  - (a) Reported (if for any reason the exporter wishes to record their movement) under Schedule B number 9801.20.0000, whether loaded or empty; and
  - (b) The value reported for such instruments of international traffic shall exclude the value of the contents (if any) of such containers.
  
3. This chapter does not cover:
  - (a) Articles exported after having been imported temporarily under bond for processing (importations under statistical reporting number 9813.00.0520).
  - (b) Those food products donated for relief or charity provided for in chapter 1 through 16 when shipped individually in bulk.
  - (c) Shipments of commodities for relief or charitable purposes by government agencies, except used wearing apparel donated by government agencies.

## CHAPTER 4

### DAIRY PRODUCE; BIRDS' EGGS; NATURAL HONEY; EDIBLE PRODUCTS OF ANIMAL ORIGIN, NOT ELSEWHERE SPECIFIED OR INCLUDED

I  
4-1

#### Notes

1. The expression "milk" means full cream milk or partially or completely skimmed milk.
2. For the purposes of heading 0405:
  - (a) The term "butter" means natural butter, whey butter or recombined butter (fresh, salted or rancid, including canned butter) derived exclusively from milk, with a milkfat content of 80 percent or more but not more than 95 percent by weight, a maximum milk solids-not-fat content of 2 percent by weight and a maximum water content of 16 percent by weight. Butter does not contain added emulsifiers, but may contain sodium chloride, food colors, neutralizing salts and cultures of harmless lactic-acid-producing bacteria.
  - (b) The expression "dairy spreads" means a spreadable emulsion of the water-in-oil type, containing milkfat as the only fat in the product, with a milkfat content of 39 percent or more but less than 80 percent by weight.
3. Products obtained by the concentration of whey and with the addition of milk or milkfat are to be classified as cheese in heading 0406 provided that they have the three following characteristics:
  - (a) A milkfat content, by weight of the dry matter, of 5 percent or more;
  - (b) A dry matter content, by weight, of at least 70 percent but not exceeding 85 percent; and
  - (c) They are molded or capable of being molded.
4. This chapter does not cover:
  - (a) Products obtained from whey, containing by weight more than 95 percent lactose, expressed as anhydrous lactose calculated on the dry matter (heading 1702);
  - (b) Products obtained from milk by replacing one or more of its natural constituents (for example, butyric fats) by another substance (for example, oleic fats) (heading 1901 or 2106); or
  - (c) Albumins (including concentrates of two or more whey proteins, containing by weight more than 80 percent whey proteins, calculated on the dry matter) (heading 3502) or globulins (heading 3504).

#### Subheading Notes

1. For the purposes of subheading 0404.10, the expression "modified whey" means products consisting of whey constituents, that is, whey from which all or part of the lactose, proteins or minerals have been removed, whey to which natural whey constituents have been added, and products obtained by mixing natural whey constituents.
2. For the purposes of subheading 0405.10 the term "butter" does not include dehydrated butter or ghee (subheading 0405.90).

#### Additional U.S. Notes

1. For the purposes of this schedule, the term "dairy products described in additional U.S. note 1 to chapter 4" means any of the following goods: malted milk, and articles of milk or cream (except (a) white chocolate and (b) inedible dried milk powders certified to be used for calibrating infrared milk analyzers); articles containing over 5.5 percent by weight of butterfat which are suitable for use as ingredients in the commercial production of edible articles (except articles within the scope of other import quotas provided for in additional U.S. notes 2 and 3 to chapter 18); or, dried milk, whey or buttermilk (of the type provided for in subheadings 0402.10, 0402.21, 0403.90 or 0404.10) which contains not over 5.5 percent by weight of butterfat and which is mixed with other ingredients, including but not limited to sugar, if such mixtures contain over 16 percent milk solids by weight, are capable of being further processed or mixed with similar or other ingredients and are not prepared for marketing to the ultimate consumer in the identical form and package in which imported.
2. For the purposes of this schedule, the expression "EU27" refers to articles the product of one of the following: Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, the Federal Republic of Germany, Hungary, Greece, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Spain, Slovenia, the Slovak Republic, Sweden or the United Kingdom.

## Additional U.S. Notes (con.)

3. For the purposes of this chapter, the term "soft ripened cow's milk cheese" means cheese which:
  - (a) Has a prominent crust formed on the exterior surface as a result of curing or ripening by biological curing agents such as molds, yeasts or other microorganisms;

#### Notes:

1. This chapter does not cover:
  - (a) Edible products (other than guts, bladders and stomachs of animals, whole and pieces thereof, and animal blood, liquid or dried);

3. Throughout the tariff schedule, elephant, hippopotamus, walrus, narwhal and wild boar tusks, rhinoceros horns and the teeth of all animals are regarded as "ivory."
4. Throughout the tariff schedule, the expression "horsehair" means hair of the manes or tails of equine or bovine animals. Heading 0511 covers, inter alia, horsehair and horsehair waste, whether or not put up as a layer with or without supporting material.

#### Additional U.S. Notes:

1. (a) Except as provided in paragraphs (b) and (c) of this note, the importation of the feathers or skin of any bird is hereby prohibited. Such prohibition shall apply to the feathers or skin of any bird:
  - (i) Whether raw or processed;
  - (ii) Whether the whole plumage or skin or any part of either;
  - (iii) Whether or not attached to a whole bird or any part thereof; and
  - (iv) Whether or not forming part of another article.
- (b) Paragraph (a) shall not apply:
  - (i) In respect of any of the following birds (other than any such bird which, whether or not raised in captivity, is a wild bird): chickens (including hens and roosters), turkeys, guineas, geese, ducks, pigeons, ostriches, rheas, English ring-necked pheasants and pea fowl;

## Additional U.S. Notes: (con.)

- (ii) For use in the manufacture of artificial flies used for fishing, or for millinery purposes, not more than 45,000 skins, in the aggregate, of the following species of pheasant: Lady Amherst pheasant (Chrysolophus amerstiae), golden pheasant (Chrysolophus pictus), silver pheasant (Lophura nycthemera), Reeves pheasant (Syrmaticus reevesii), blue-eared pheasant (Crossoptilon auritum) and brown-eared pheasant (Crossoptilon mantchuricum) 1/

For the purposes of these quotas, any part of a skin which has been severed shall be considered to be a whole skin.

- (d) No article specified in paragraph (c) shall be entered except under a permit issued by the Secretary of the Interior. The Secretary of the Interior shall prescribe such regulations as may be necessary to carry out the purposes and provisions of paragraph (c) (including regulations providing for equitable allocation among qualified applicants of the import quotas established by such provisions). Whenever the Secretary of the Interior finds that the wild supply of any species mentioned in paragraph (c) is threatened with serious reduction or with extinction, he shall prescribe regulations which provide (to such extent and for such period as he deems necessary to meet such threat):
  - (i) In the case of grey jungle fowl or mandarin duck, for the reduction of the applicable import quota; or
  - (ii) In the case of any species of pheasant, for the reduction of the import quota established for pheasants, for the establishment of a subquota for such species of pheasant, or for the elimination of such species from the import quota for pheasant, or any combination thereof.

The authority granted to the Secretary of the Interior by the preceding sentence to reduce any import quota shall include authority to eliminate such quota. 2/

- (e) Any article of a kind the importation of which is prohibited or subjected to a quota by paragraphs (a), (b) and (c) above, and which is in the United States shall be presumed for the purposes of seizure and forfeiture to have been imported in violation of law and shall be seized and forfeited under the customs laws unless such presumption is satisfactorily rebutted; except that such presumption shall not apply to articles in actual use for personal adornment or for scientific or educational purposes. Any article so forfeited may (in the discretion of the Secretary of the Treasury and under such regulations as he may prescribe) (1) be placed with any agency of the Federal Government or of any State government, or any society or museum for exhibition or scientific or educational purposes, or (2) be destroyed.
- (f) Nothing in this note shall be construed to repeal the provision of the act of March 4, 1913, chapter 145 (37 Stat. 847), or the act of July 3, 1918 (40 Stat. 755), or any other law of the United States, now of force, intended for the protection or preservation of birds within the United States. If on investigation by the district director of Customs before seizure, or before trial for forfeiture, or if at such trial if such seizure has been made, it shall be made to appear to the district director of Customs, or to the prosecuting officer of the Government, as the case may be, that no illegal importation of such feathers has been made, but that the possession, acquisition or purchase of such feathers is or has been made in violation of the provisions of the act of March 4, 1913, chapter 145 (37 Stat. 847), or the act of July 3, 1918 (40 Stat. 755), or any other law of the United States, now of force, intended for the protection or preservation of birds within the United States, it shall be the duty of the district director of Customs, or such prosecuting officer, as the case may be, to report the facts to the proper officials of the United States, or State or Territory charged with the duty of enforcing such laws.

1/ Brown-eared pheasant added to the List of Endangered Foreign Fish and Wildlife, Appendix A of 50 CFR 17, Nov. 24, 1970, effective date Dec. 2, 1970 (35 F.R. 18319, 18321).

2/ The Secretary of Interior repealed regulations which implemented the feather import quotas contained in the Tariff Classification Act of 1962, effective on or after November 16, 1993 (58 FR 60524-60525).

#### Notes

1. Mixtures of the products of headings 0904 to 0910 are to be classified as follows:

- (a) Mixtures of two or more of the products of the same heading are to be classified in that heading;
- (b) Mixtures of two or more of the products of different headings are to be classified in heading 0910.

The addition of other substances to the products of headings 0904 to 0910 (or to the mixtures referred to in paragraph (a) or (b) above) shall not affect their classification provided the resulting mixtures retain the essential character of the goods of those headings. ## SECTION IV

### PREPARED FOODSTUFFS; BEVERAGES, SPIRITS AND VINEGAR; TOBACCO AND MANUFACTURED TOBACCO SUBSTITUTES

IV-1

#### Note

1. In this section the term "pellets" means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3 percent by weight.

#### Additional U.S. Notes

1. In this section the term "canned" means preserved in airtight containers by heat processing to destroy or inactivate micro-organisms and enzymes that otherwise could cause spoilage.
2. For the purposes of this section, unless the context otherwise requires--
  - (a) the term "percent by dry weight" means the sugar content as a percentage of the total solids in the product;
  - (b) The term "capable of being further processed or mixed with similar or other ingredients" means that the imported product is in such condition or container as to be subject to any additional preparation, treatment or manufacture or to be blended or combined with any additional ingredient, including water or any other liquid, other than processing or mixing with other ingredients performed by the ultimate consumer prior to consumption of the product;
  - (c) the term "prepared for marketing to the ultimate consumer in the identical form and package in which imported" means that the product is imported in packaging of such sizes and labeling as to be readily identifiable as being intended for retail sale to the ultimate consumer without any alteration in the form of the product or its packaging; and
  - (d) the term "ultimate consumer" does not include institutions such as hospitals, prisons and military establishments or food service establishments such as restaurants, hotels, bars or bakeries.

## CHAPTER 16

### PREPARATIONS OF MEAT, OF FISH OR OF CRUSTACEANS, MOLLUSCS OR OTHER AQUATIC INVERTEBRATES

IV  
16-1

#### Notes

1. This chapter does not cover meat, meat offal, fish, crustaceans, molluscs or other aquatic invertebrates, prepared or preserved by the processes specified in chapter 2 or 3 or heading 0504.
2. Food preparations fall in this chapter provided that they contain more than 20 percent by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified in the heading of chapter 16 corresponding to the component or components which predominate by weight. These provisions do not apply to the stuffed products of heading 1902 or to the preparations of heading 2103 or 2104.

#### Subheading Notes

1. For the purposes of subheading 1602.10, the expression "homogenized preparations" means preparations of meat, meat offal or blood, finely homogenized, put up for retail sale as food suitable for infants or young children or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of meat or meat offal. This subheading takes precedence over all other subheadings of heading 1602.
2. The fish, crustaceans, molluscs and other aquatic invertebrates specified in the subheadings of heading 1604 or 1605 under their common names only, are of the same species as those mentioned in chapter 3 under the same name.

#### Additional U.S. Notes

1. For the purposes of this chapter, the term "in oil" means packed in oil or fat, or in added oil or fat and other substances, whether such oil or fat was introduced at the time of packing or prior thereto.
2. In assessing the duty on meats, no allowance shall be made for normal components thereof such as bones, fat, and hide or skin. The dutiable weight of meats in airtight containers subject to specific rates includes the entire contents of the containers.
3. For purposes of subheadings 1604.14.22 and 1604.14.30, tunas and skipjack from the freely associated states may be entered free of duty under the appropriate subheading in an aggregate quantity provided by, and under the terms set forth in, general note 10(c) to the tariff schedule. Goods from the freely associated states entered, or withdrawn from warehouse for consumption, in excess of such specified aggregate quantity shall be dutied under the appropriate subheading at the rate set forth in the "General" subcolumn of column 1.

#### Statistical Note

1. Imports of shrimp or products of shrimp are subject to the provisions of section 609 of Public Law 101-162 of November 21, 1989 (16 U.S.C. 1537 note).

## CHAPTER 17

### SUGARS AND SUGAR CONFECTIONERY

IV  
17-1

#### Note

1. This chapter does not cover:
  - (a) Sugar confectionery containing cocoa (heading 1806);
  - (b) Chemically pure sugars (other than sucrose, lactose, maltose, glucose and fructose) or other products of heading 2940; or
  - (c) Medicaments or other products of chapter 30.

#### Subheading Notes

1. For the purposes of subheadings 1701.12, 1701.13 and 1701.14, "raw sugar" means sugar whose content of sucrose by weight, in the dry state, corresponds to a polarimeter reading of less than 99.5 degrees.
2. Subheading 1701.13 covers only cane sugar obtained without centrifugation, whose content of sucrose by weight, in the dry state, corresponds to a polarimeter reading of 69° or more but less than 93°. The product contains only natural anhydrous microcrystals, of irregular shape, not visible to the naked eye, which are surrounded by residues of molasses and other constituents of sugar cane.

#### Additional U.S. Notes

1. The term "degree" as used in the "Rates of Duty" columns of this chapter means sugar degree as determined by a polarimetric test.
2. For the purposes of this schedule, the term "articles containing over 65 percent by dry weight of sugar described in additional U.S. note 2 to chapter 17" means articles containing over 65 percent by dry weight of sugars derived from sugar cane or sugar beets, whether or not mixed with other ingredients, capable of being further processed or mixed with similar or other ingredients, and not prepared for marketing to the ultimate consumer in the identical form and package in which imported.
3. For the purposes of this schedule, the term "articles containing over 10 percent by dry weight of sugar described in additional U.S. note 3 to chapter 17" means articles containing over 10 percent by dry weight of sugars derived from sugar cane or sugar beets, whether or not mixed with other ingredients, except (a) articles not principally of crystalline structure or not in dry amorphous form, the foregoing that are prepared for marketing to the ultimate consumer in the identical form and package in which imported; (b) blended syrups containing sugars derived from sugar cane or sugar beets, capable of being further processed or mixed with similar or other ingredients, and not prepared for marketing to the ultimate consumer in the identical form and package in which imported; (c) articles containing over 65 percent by dry weight of sugars derived from sugar cane or sugar beets, whether or not mixed with other ingredients, capable of being further processed or mixed with similar or other ingredients, and not prepared for marketing to the ultimate consumer in the identical form and package in which imported; or (d) cake decorations and similar products to be used in the same condition as imported without any further processing other than the direct application to individual pastries or confections, finely ground or masticated coconut meat or juice thereof mixed with those sugars, and sauces and preparations therefor.
4. For the purposes of this schedule, the term "blended syrups described in additional U.S. note 4 to chapter 17" means blended syrups containing sugars derived from sugar cane or sugar beets, capable of being further processed or mixed with similar or other ingredients, and not prepared for marketing to the ultimate consumer in the identical form and package in which imported.
5. (a) (i) The aggregate quantity of raw cane sugar entered, or withdrawn from warehouse for consumption, under subheading 1701.13.10 and 1701.14.10 during any fiscal year, shall not exceed in the aggregate an amount (expressed in terms of raw value), not less than 1,117,195 metric tons, as shall be established by the Secretary of Agriculture (hereinafter referred to as "the Secretary"), and the aggregate quantity of sugars, syrups and molasses entered, or withdrawn from warehouse for consumption, under subheadings 1701.12.10, 1701.91.10, 1701.99.10, 1702.90.10 and 2106.90.44 (under the terms of subheadings 9903.17.01 through 9903.18.10 and applicable note thereto), during any fiscal year, shall not exceed in the aggregate an amount (expressed in terms of raw value), not less than 22,000 metric tons, as shall be established by the Secretary. With either the aggregate quantity for raw cane sugar or the aggregate quantity for sugars, syrups and molasses other than raw cane sugar, the Secretary may reserve a quota quantity for the importation of specialty sugars as defined by the United States Trade Representative.

## Additional U.S. Notes (con.)

- (ii) Whenever the Secretary believes that domestic supplies of sugars may be inadequate to meet domestic demand at reasonable prices, the Secretary may modify any quantitative limitations which have previously been established under this note but may not reduce the total amounts below the amounts provided for in subdivision (i) hereof.
  - (iii) The Secretary shall inform the Secretary of the Treasury of any determination made under this note. Notice of such determinations shall be published in the Federal Register.
  - (iv) Sugar entering the United States during a quota period established under this note may be charged to the previous or subsequent quota period with the written approval of the Secretary.
- (b) (i) The quota amounts established under subdivision (a) may be allocated among supplying countries and areas by the United States Trade Representative.
- (ii) The United States Trade Representative, after consultation with the Secretaries of State and Agriculture, may modify, suspend (for all or part of the quota amount), or reinstate the allocations provided for in this subdivision (including the addition or deletion of any country or area) if he finds that such action is appropriate to carry out the rights or obligations of the United States under any international agreement to which the United States is a party or is appropriate to promote the economic interests of the United States.
  - (iii) The United States Trade Representative shall inform the Secretary of the Treasury of any such action and shall publish notice thereof in the Federal Register. Such action shall not become effective until the day following the date of publication of such notice in the Federal Register or such later date as may be specified by the United States Trade Representative.
  - (iv) The United States Trade Representative may promulgate regulations appropriate to provide for the allocations authorized pursuant to this note. Such regulations may, among other things, provide for the issuance of certificates of eligibility to accompany any sugars, syrups or molasses (including any specialty sugars) imported from any country or area for which an allocation has been provided and for such minimum quota amounts as may be appropriate to provide reasonable access to the U.S. market for articles the product of those countries or areas having small allocations.
- (c) For purposes of this note, the term raw value means the equivalent of such articles in terms of ordinary commercial raw sugar testing 96 degrees by the polariscope as determined in accordance with regulations or instructions issued by the Secretary of the Treasury. Such regulations or instructions may, among other things, provide: (i) for the entry of such articles pending a final determination of polarity; and (ii) that positive or negative adjustments for differences in preliminary and final raw values be made in the same or succeeding quota periods. The principal grades and types of sugar shall be translated into terms of raw value in the following manner--
- (A) For articles described in subheadings, 1701.12.05, 1701.12.10, 1701.12.50, 1701.13.05, 1701.13.10, 1701.13.20, 1701.13.50, 1701.14.05, 1701.14.10, 1701.14.20, 1701.14.50, 1701.91.05, 1701.91.10, 1701.91.30, 1701.99.05, 1701.99.10, 1701.99.50, 2106.90.42, 2106.90.44 and 2106.90.46 by multiplying the number of kilograms thereof by the greater of 0.93, or 1.07 less 0.0175 for each degree of polarization under 100 degrees (and fractions of a degree in proportion).
  - (B) For articles described in subheadings 1702.90.05, 1702.90.10 and 1702.90.20, by multiplying the number of kilograms of the total sugars thereof (the sum of the sucrose and reducing or invert sugars) by 1.07.
  - (C) The Secretary of the Treasury shall establish methods for translating sugar into terms of raw value for any special grade or type of sugar, syrup, or molasses for which he/she determines that the raw value cannot be measured adequately under the above provisions.
6. Raw cane sugar classifiable in subheading 1701.13.20 and 1701.14.20 shall be entered only to be used for the production (other than by distillation) of polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar in human food consumption, or to be refined and reexported in refined form or in sugar-containing products, or to be substituted for domestically produced raw cane sugar that has been or will be exported. The Secretary of Agriculture may issue licenses for such entries and may promulgate such regulations (including any terms, conditions, certifications, bonds, civil penalties, or other limitations) as are appropriate to ensure that sugar entered under subheading 1701.13.20 and 1701.14.20 is used only for such purposes.
7. The aggregate quantity of articles containing over 65 percent by dry weight of sugars described in additional U.S. note 2 to chapter 17, entered under subheadings 1701.91.44, 1702.90.64, 1704.90.64, 1806.10.24, 1806.10.45, 1806.20.71, 1806.90.45, 1901.20.20, 1901.20.55, 1901.90.67, 2101.12.44, 2101.20.44, 2106.90.74 and 2106.90.92 during the 12-month period from October 1 in any year to the following September 30, inclusive, shall be none and no such articles shall be classifiable therein.

## CHAPTER 20

### PREPARATIONS OF VEGETABLES, FRUIT, NUTS OR OTHER PARTS OF PLANTS

IV  
20-1

#### Notes

1. This chapter does not cover:
  - (a) Vegetables, fruit or nuts, prepared or preserved by the processes specified in chapter 7, 8 or 11;
  - (b) Food preparations containing more than 20 percent by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof (chapter 16);
  - (c) Bakers' wares and other products of heading 1905; or
  - (d) Homogenized composite food preparations of heading 2104.
2. Headings 2007 and 2008 do not apply to fruit jellies, fruit pastes, sugar-coated almonds or the like in the form of sugar confectionery (heading 1704) or chocolate confectionery (heading 1806).
3. Heading 2001, 2004 and 2005 cover, as the case may be, only those products of chapter 7 or of heading 1105 or 1106 (other than flour, meal and powder of the products of chapter 8), which have been prepared or preserved by processes other than those referred to in note 1(a).
4. Tomato juice the dry weight content of which is 7 percent or more is to be classified in heading 2002.
5. For the purposes of heading 2007, the expression "obtained by cooking" means obtained by heat treatment at atmospheric pressure or under reduced pressure to increase the viscosity of a product through reduction of water content or other means.
6. For the purposes of heading 2009 the expression "juices, unfermented and not containing added spirit" means juices of an alcoholic strength by volume (see note 2 to chapter 22) not exceeding 0.5 percent vol.

#### Subheading Notes

1. For the purposes of subheading 2005.10, the expression "homogenized vegetables" means preparations of vegetables, finely homogenized, put up for retail sale as food suitable for infants or young children or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of vegetables. Subheading 2005.10 takes precedence over all other subheadings of heading 2005.
2. For the purposes of subheading 2007.10, the expression "homogenized preparations" means preparations of fruit, finely homogenized, put up for retail sale as food suitable for infants or young children or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of fruit. Subheading 2007.10 takes precedence over all other subheadings of heading 2007.
3. For the purposes of subheadings 2009.12, 2009.21, 2009.31, 2009.41, 2009.61 and 2009.71, the expression "Brix value" means the direct reading of degrees Brix obtained from a Brix hydrometer or of refractive index expressed in terms of percentage sucrose content obtained from a refractometer, at a temperature of 20 °C or corrected for 20 °C if the reading is made at a different temperature.

#### Additional U.S. Notes

1. For the purposes of heading 2009:
  - (a) The term "liter" in the "Rates of Duty" column of the provisions applicable to fruit juices means liter of natural unconcentrated fruit juice or liter of reconstituted fruit juice;
  - (b) The term "reconstituted fruit juice" means the product which can be obtained by mixing the imported concentrate with water in such proportion that the product will have a Brix value equal to that found by the Secretary of the Treasury from time to time to be the average Brix value of like natural unconcentrated juice in the trade and commerce of the United States; and

## Additional U.S. Notes (con.)

- (c) The term "Brix value" means the refractometric sucrose value of the juice, adjusted to compensate for the effect of any added sweetening materials, and thereafter corrected for acid.
2. In determining the number of liters of reconstituted fruit juice which can be obtained from a concentrate, the degree of concentration shall be calculated on a volume basis to the nearest 0.5 degree, as determined by the ratio of the Brix value of the imported concentrated juice to that of the reconstituted juice, corrected for differences of specific gravity of the juices. Any juice having a degree of concentration of less than 1.5 (as determined before correction to the nearest 0.5 degree) shall be regarded as a natural unconcentrated juice.
  3. In determining the degree of concentration of mixed fruit juices, the mixture shall be considered as being wholly of the component juice having the lowest Brix value.
  4. The aggregate quantity of olives entered under subheadings 0711.20.18 and 2005.70.06 in any calendar year shall not exceed 4,400 metric tons.
  5. The aggregate quantity of peanut butter and paste entered under subheading 2008.11.05 in any calendar year shall not exceed the quantities specified in this note (articles the product of Mexico shall not be permitted or included under the aforementioned quantitative limitation and no such articles shall be classifiable therein).

Canada	14,500
Argentina	3,650
Countries or territories identified in additional U.S. note 6 to this chapter combined (aggregate)	1,600
Other countries or areas	250

Imports of peanut butter and paste under this note are subject to regulations as may be issued by the United States Trade Representative or other designated agency.
